

Incture's Packaged Offering for Migration to SAP Integration Suite

Neo to SAP Integration Suite Starter Migration Packages

Offering	Package 1 – SILVER (Technical Migration)	Package 2 – GOLD (Technical Migration)	Package 3 – PLATINUM (Technical Migration + Capped Enhancement)
Number of interfaces to be migrated	25	60	100
Number of Applications to be supported	Up to 5	Up to 10	Up to 20
Enhancement	-	-	20 hours (simple enhancement)
Adapters	Standard Adapters	Standard adapters + Application adapters support	Standard adapters + Application adapters support
Transport Management (CTMS)	Supported	Supported	Supported
BASIS Effort 1.BASIS Set up for CF tenant 2.CTMS Setup for CF 3.CC configuration support	✓ Config and Setup of SAP Integration Suite tenant ✓ CTMS Setup for CF ✓ CC configuration support ✓ Best migration approach, plan & documentation	✓ Config and Setup of SAP Integration Suite tenant ✓ CTMS Setup for CF ✓ CC configuration support ✓ Best migration approach, plan & documentation	✓ Config and Setup of SAP Integration Suite tenant ✓ CTMS Setup for CF ✓ CC configuration support ✓ Best migration approach, plan & documentation

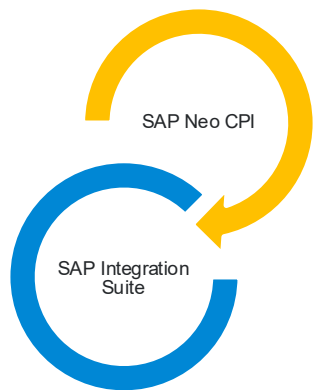

Please Note :-

The migration to SAP Integration Suite packages are indicative, timeline, cost and plans may vary based on the actual requirement, interface complexity breakup and availability of resources during the time of migration.

- Complexity Break up is assumed to be S : M : L/XL :: 60% : 30% : 10%
- Any Enhancements apart or Development work apart from SAP IS, is not in-Scope

Offering	Package 1 – SILVER (Technical Migration)	Package 2 – GOLD (Technical Migration)	Package 3 – PLATINUM (Technical Migration + Capped Enhancement)
Enablement Sessions	- Integration Suite Overview Sessions - KT Session on the interfaces developed - Support with Naming conventions for - A2A Integrations - TSD documents – standard	- Integration Suite Overview sessions - KT Session on the interfaces developed - Support with Naming conventions for - B2B Integrations - TPM artifacts - A2A Integrations - API-M Artifacts - TSD documents – standard - API Management & Reuse Strategy - Mapping documentations - Extended 1 week hyper-care support	- Integration Suite Overview sessions - KT Session on the interfaces develop - Support with Naming conventions for - B2B Integrations - TPM artifacts - A2A Integrations - API-M Artifacts - API Management & Reuse Strategy - TSD documents – standard and customized - Mapping documentations - Extended 1 week hyper-care support - Hyper-care daily reports
Alerting	Error alerting by Mail	Error alerting by Mail	Error alerting by Mail
Hypercare Support	2 weeks	3 weeks	3 weeks
Estimated Timelines	3 months	4.5 months	6 months
Team Composition	Project Manager, Integration Consultants, BASIS	Project Manager, Integration Consultants, BASIS	Project Manager, Integration Consultants, BASIS
Costing (Indicative) (in USD)	25K	55K	70K

SAP PI/PO to SAP Integration Suite Starter Migration Package

Package	Starter package	SILVER(Small Scope)	GOLD(Medium Scope)	PLATINUM(Large Scope)
Number of Interfaces	Up to 10 Golden Interfaces (Mixed complexity)	50 (Mixed complexity)	100 (Mixed complexity)	150 (Mixed complexity)
Number of Applications	Up to 2	Up to 5	Up to 10	Up to 20
Platform Setup	Supported	Supported	Supported	Supported
For B2B migration - Trading Partner /Transaction support	1 Trading partner /1 unique Transaction	10 Trading partner /up to 4 unique Transaction	10 Trading partner / up to 8 unique Transactions	10+ Trading partner / up to 12 unique Transactions
Modernization	Integration Design Modernization Mapping Modernization Adapter and connectivity strategy Version control for i-Flows Cloud based - Reusable artifacts support - Common iflow design for IDocs - Error handling and alerts - Enhance retry mechanism	Integration Design Modernization Mapping Modernization Adapter and connectivity strategy Version control for i-Flows Cloud based - Reusable artifacts support - Common iflow design for IDocs - Error handling and alerts - standard - Enhance retry mechanism with JMS queue API-M lead integration approach - Reusable integrations as managed APIs - Standard Policies supported	Integration Design Modernization Mapping Modernization Adapter and connectivity strategy Version control for i-Flows Cloud based - Reusable artifacts support - Common iflow design for IDocs - Error handling and alerts – standard and customizable - Enhance retry mechanism with JMS queue B2B/EDI Modernization (If Applicable) API-M lead integration approach - Reusable integrations as managed APIs - Standard and Custom Policy support EDA – Event Driven Architecture - Event Mesh	Integration Design Modernization Mapping Modernization Adapter and connectivity strategy Version control for i-Flows Cloud based - Reusable artifacts support - Common iflow design for IDocs - Error handling and alerts – standard and customizable - Enhance retry mechanism with JMS queue B2B/EDI Modernization (If Applicable) API-M lead integration approach Reusable integrations as managed APIs - Standard and custom policies supported EDA – Event Driven Architecture - Event Mesh - Advanced Event Mesh
Transport Management (CTMS)	Not Supported	Supported - BTP destination setup - TMS role setup - Configure and setup CTMS Nodes and routes - Support TR request	Supported - BTP destination setup - TMS role setup – standard and custom - Configure and setup CTMS Nodes & routes - Support TR request - Cross Actions for TPM for B2B as applicable	Supported - BTP destination setup' - TMS role setup – standard and custom - Configure and setup CTMS Nodes & routes - Support TR request - Cross Actions for TPM for B2B as applicable
Custom Archiving Support	NA	Supported with SFTP	Supported with SFTP, DMS etc.	Supported with SFTP, DMS etc.

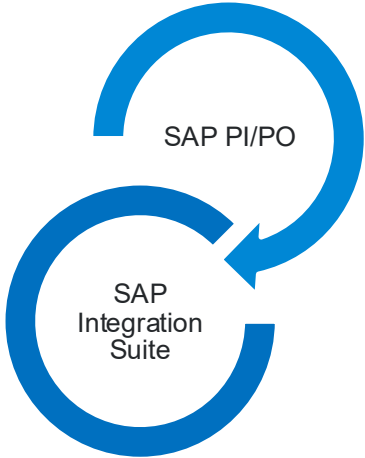

Please Note :-

The migration to SAP Integration Suite packages are indicative, timeline, cost and plans may vary based on the actual requirement, interface complexity breakup and availability of resources during the time of migration.

- Complexity Break up is assumed to be S : M : L/XL :: 60% : 30% : 10%
- Any Enhancements apart or Development work apart from SAP IS, is not in-Scope
- Applicable for PO 7.5 single stack. Dual stack scenarios will have 15% price increase

SAP PI/PO to SAP Integration Suite Starter Migration Package

Package	Starter package	SILVER(Small Scope)	GOLD(Medium Scope)	PLATINUM(Large Scope)
Adapters Included	Standard	Standard + Application adapters	Standard + Application adapters	Standard + Application adapters
IntSwitch : PO Test Automation tool	Partial Support (Internal Tool) : Internal Accelerator for migration, testing and quality monitoring	Supported (Internal Tool) : Internal Accelerator for migration, testing and quality monitoring	Supported (Internal Tool) : Internal Accelerator for migration, testing and quality monitoring	Supported (Internal Tool) : Internal Accelerator for migration, testing and quality monitoring
Enhancements/New requirements	NA	NA	- Enhance and upgrade support for new requirements/developments equivalent to 3 PD efforts - Support 2 additional Change requests	- Enhance and upgrade support for new requirements/development equivalent to 5 PD efforts - Support 3 additional Change requests
Enablement Sessions	-	- Integration Suite Overview Sessions - KT Session on the interfaces developed - Support with Naming conventions for - A2A Integrations - TSD documents – standard	- Integration Suite Overview sessions - KT Session on the interfaces developed - Architectural design documents - Support with Naming conventions for - B2B Integrations - TPM artifacts - A2A Integrations - API-M Artifacts - TSD documents – standard - API Management & Reuse Strategy - Mapping documentations - Extended 1 week hyper-care support	- Integration Suite Overview sessions - KT Session on the interfaces develop - Architectural design documents - Support with Naming conventions for - B2B Integrations - TPM artifacts - A2A Integrations - API-M Artifacts - API Management & Reuse Strategy - TSD documents – standard and customized - Mapping documentations - Extended 1 week hyper-care support - Hyper-care daily reports
Monitoring & Logging	Supported	Supported API-M Monitoring - standard	Supported (Customer alerts) API-M Monitoring - customized	Supported (Customer alerts) API-M Monitoring-customized and Logging IntSwitch Quality Monitoring and Governance dashboards
Hypercare Support	2 week	2 weeks	3 weeks	3 weeks
Estimated Timeline	2 months	4 months	7 months	9 months
Team Composition	PM + Integration Developer + BASIS	PM + 2 Integration Developer + BASIS	PM + Lead + 2 Integration Developers + Architect + BASIS	PM + Architect + Lead + 3 Integration Developers + BASIS & Security
Pricing Model (Indicative) (Pricing Range) : In USD	19 K	65 K	110 K	145 K

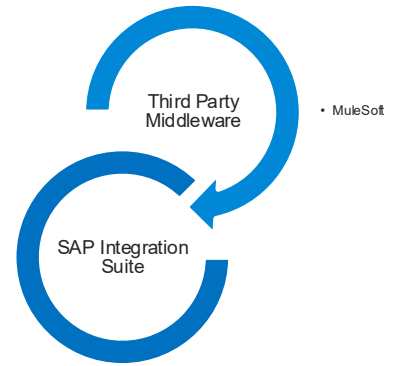

Please Note :-
